Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/540,911	Applicant(s) KAWAGOE ET AL.	
	Examiner William C. Joyce	Art Unit 3656	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

This is the First Office Action in response to the above identified patent application filed on June 27, 2005.

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kanayama (EP 1236914) in view of at least one of Okawa (JP 2002-147459), Yamamoto (JP 10-131969), or Yamada (USP 6,491,436).

Kanayama discloses a sliding bearing including a bearing alloy layer and an overlay layer spread on the surface of the bearing alloy layer and formed by a solid lubricant and a resin; the bearing alloy layer is formed to be a flat surface that undergoes a roughening operation (page 4, lines 45+) to promote adhesion.

Art Unit: 3656

Kanayama does not appear to disclose a regular uneven configuration being formed on the surface of the overlay layer, however it was notoriously known in the art to form a pattern of grooves for improving the flow of lubrication of a bearing. For example, the prior art to either Okawa, Yamamoto, or Yamada disclose a bearing having a pattern of grooves. It would have been obvious to one of ordinary skill in the art to modify the bearing of Kanayama with a pattern of grooves, as taught by one of Okawa, Yamamoto, or Yamada, motivation being to improve the lubrication of the bearing.

With respect to claim 2, see Figure 2 of Yamamoto.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to William C. Joyce whose telephone number is (571) 272-7107. The examiner can normally be reached on Monday - Thursday 7:30-5:00.
